MID certified meters for settling

LED status indication

Assembly to wall or station

179x190x91 mm (WxHxD)

Plug & Charge

Cable, type 1 or 2

The charging station

Reliable, simple and easy to use, this characterises Alfen's most compact charging station. The Compact Mini is of high quality with a dust-free and water-tight aluminium casing (IP67). This makes the product incredibly robust and highly suitable for daily outside use. Because it is so easily controllable, the user does not need to bother with charging cards.

Plug & Charge

The Compact Mini is equipped with the unique Plug & Charge principle. This means that the charging process can

be initiated in just one step; connecting the cable to the car. The charging station then communicates with the car automatically. No further actions are required. To stop charging you can easily unplug the cable from the car. Optimal convenience with the safety, reliability and quality guarantee from Alfen.

The bright three-colour LED provides the user with feedback on the charging status instantly. When the charging station is not in use, the LED will not be illuminated, causing the product to subtly present.
