Report of the Management Board
This semi-annual report of Alfen N.V. (hereafter “Alfen” or “the Company”) for the six months ended 30 June 2022 consists of the semi-annual report of the management board of the Company (the “Management Board”), including the responsibility statement by the Management Board, and the Condensed Interim Consolidated Financial Statements and the accompanying notes. All information included in this report is unaudited.

The Management Board hereby declares that to the best of its knowledge, the semi-annual report of the Management Board gives a fair review of the information required pursuant to section 5:25d sub 8-9 of the Dutch Financial Markets Supervision Act (“Wet op het financieel toezicht”) and the Condensed Interim Consolidated Financial Statements as at and for the six months ended 30 June 2022, which have been prepared in accordance with IAS 34 - Interim Financial Reporting as adopted by the European Union, give a true and fair view of the assets, liabilities, financial position and profit of the Company and the undertakings included in the consolidation taken as a whole.

Alfen is listed on the Amsterdam Stock Exchange.

Revenue and other income increased by 78% to €205.5 million in the first half-year of 2022 from €115.3 million in the first half-year of 2021.

In the EV charging equipment business line, HY1 2022 revenue was €125.0 million, compared with €41.3 million in the first half-year of 2021. A growth of 202%, driven by increasing volumes and new markets under existing framework agreements, new client wins and further internationalisation.

Alfen continued its internationalisation strategy by further strengthening its international organisation. In HY1 2022, more than 69% of revenue was generated outside of the Netherlands.

The European market for EV charge points has a long-term growth trend with a CAGR >30% in the period 2020-2030 (source: Guidehouse). This long-term growth trend is also reflected in the first half-year of 2022 with growing EV adoption in European markets. 32% more battery EVs were sold than in the same period last year (source: ACEA).

Solvency (equity divided by total assets) stood at 47.2% at the end of June 2022 compared to 49.6% at the end of December 2021.

Capital expenditure amounted to €10.1 million as compared to €5.4 million in the same period of 2021. Capex in the first half-year of 2022 includes investments in new moulds for our EV Charging and Smart grids business lines, followed by product line automation for EV Charging, ongoing investments in IT-infrastructure and Data Security as well as investments in additional solar panels for our buildings.

Additionally, Alfen capitalised €4.8 million (versus €3.3 million in the first half-year of 2021) of development costs, which demonstrates the Company’s continued efforts to invest in innovations for the future.

Related party transactions

Transactions with the most important related parties are disclosed in Note 11 of the condensed interim consolidated financial statements.
**Principle risks and uncertainties**

In our Annual Report 2021, we have extensively described certain risks and uncertainties, which could have a material adverse effect on our financial position and results. We believe that the risks identified for the second half-year of 2022 are unchanged compared to the risks that were presented in our Annual Report 2021. However, we would like to report on the following in addition to our Annual Report 2021.

The current global supply chain challenges affect Alfen directly through its own supply chain and indirectly, for example, through the supply chain of electric vehicles. Up until this point, Alfen has been able to manage these challenges. Alfen expects that the supply chain pressures remain in 2022 and 2023. Therefore, Alfen continues to deploy its measures to maximise grip on the supply chain and secure supplies: (1) Daily meetings of integrated team (purchasing, R&D, sales and operations) to make purchasing and logistical decisions, under direct supervision of Alfen’s Board, (2) engagement with Alfen’s tier 2 and tier 3 suppliers, next to tier 1 suppliers and (3) strategic down payments and safeguard strategic stock levels for batteries, inverters, containers and electrical components.

**Investments**

Our organisation grew from 683 FTEs at 31 December 2021 to 770 FTEs at 30 June 2022, including 71 FTEs at Alfen Elkamo.

Anticipating further growth and internationalisation, we expect a further increase in FTEs for the second half-year of 2022. Investment plans for the second half-year of 2022 primarily relate to R&D as well as further investments in property, plant and equipment, specifically related to production line automation, IT-infrastructure and Data Security and moulds for both our EV Charging and Smart grids business lines.

**Outlook**

Alfen expects that its markets will continue to grow throughout 2022, as the transition to a carbon-free energy system that is not dependent on fossil fuels is building ever more momentum across Europe.

Alfen continues to experience supply chain challenges and expect challenges to continue well into 2023. Alfen remains committed to being on top of the situation through deploying its rigid operational processes.

Long-term, Alfen continues to anticipate positive market developments for all its business lines. New legislation that is currently in the making pushes the energy transition further. For instance, in June 2022 the EU council confirmed the phase out of internal combustion engines for cars and vans by 2035. As such, Alfen continues to further invest in its organisation, innovations and production facilities.

Based on the first half year performance and current revenue visibility, Alfen raises its full-year 2022 revenue outlook from €350-420 million to €410-470 million.

Notes to the condensed interim consolidated financial statements

Note 1 General information
Alfen N.V. (hereafter “Alfen” or “the Company”) is a public limited liability company (N.V.) which main activity is to develop, produce and sell products, systems and services related to the electricity grid, including smart grid solutions, charging equipment for electric vehicles and energy storage systems. Alfen’s main geographic focus is the Netherlands, followed by Finland, Belgium, Germany, the United Kingdom, France and the rest of Europe.

These condensed interim consolidated financial statements as at and for the six months ended 30 June 2022 comprise the Company and its subsidiaries (together referred to as “the Group”). The condensed interim consolidated financial statements are unaudited.

Alfen is the holding company of the Group. Alfen was listed on the Amsterdam Stock Exchange on 22 March 2018 and has its registered office at Helbrugweg 28, 1332 AP, Almere, the Netherlands. The statutory seat is in Amsterdam, the Netherlands.

Alfen is registered in the Chamber of Commerce under number 644.62.846.

This semi-annual report was authorised for issue by the Company’s Board of Directors and approved by the Supervisory Board on 24 August 2022.

Note 2 Summary of significant accounting policies
Basis of preparation
The condensed interim consolidated financial statements as at and for the six months ended 30 June 2022 have been prepared in accordance with IAS 34 Interim Financial Reporting as adopted by the European Union. They do not include all of the information required for a complete set of IFRS financial statements and should be read in conjunction with Alfen’s Annual Report 2021.

All amounts have been rounded to the nearest thousand, unless otherwise indicated.

Basis of measurement
The accounting policies adopted are consistent with those applied in the IFRS consolidated financial statements as at and for the year ended 31 December 2021.

Note 3 Critical accounting estimates and judgements
The preparation of the condensed interim consolidated financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of assets and liabilities and the reported amounts of revenues and expenses during the reported periods. The estimates and associated assumptions are based on historical experiences and various other factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates.

The significant judgements made by management in applying the Company’s accounting policies and the key sources of estimation uncertainty were the same as those described in the last annual financial statements.

Note 4 Changes in accounting policies and disclosures
The accounting policies adopted are consistent with those applied in the IFRS consolidated financial statements as at and for the year ended 31 December 2021.

A number of new amendments to standards are effective from 1 January 2022 but they do not have a material effect on the Company’s condensed interim consolidated financial statements.

New standards and interpretations not yet adopted
Certain new accounting standards and amendments to standards have been published that are not mandatory for reporting periods starting on or after 1 January 2022 and have not been early adopted by the Company. For none of these standards that are not yet effective it is expected that they have a material impact on the Company in the current or future reporting periods and on foreseeable future transactions.

Note 5 Segment information
Operating segments
The Company is engaged in the business of developing, producing and selling various products, systems and services related to the electricity grid. There is a strong interrelationship between our three product groups - i.e. Smart grid solutions, EV charging equipment and Energy storage systems.

IFRS 8 requires disclosures of segment information in alignment with internal management reporting to the Chief Operating Decision Maker (“CODM”). Alfen’s CEO is considered the CODM, who is ultimately responsible for reviewing and assessing the performance of the three separately identified product groups.

The CODM monitors the performance of the three product groups, despite the split in revenue, solely on an aggregated basis for resource allocation and overall performance measurement. All financial segment information can therefore be found in the condensed interim consolidated financial statements.
The Company’s operations and main revenue streams from contracts with customers are those described in Alfen’s Annual Report 2021.

The Company derives the following revenues and other income per business line:

Smart grid solutions and Energy storage systems revenue generated by entities domiciling in the Netherlands and Belgium amounting to €68.4 and €2.9 million, respectively, is considered to be over time revenue for which the cost-to-cost method is applied by the Company. Smart grid solutions revenue generated by Alfen Elkamo - i.e. €3.2 million - as well as the Company’s EV charging equipment revenue of €125 million is considered to be point-in-time revenue.

Revenue and other income by region based on the destination of products and location of projects is as follows:

Long-term incentive plan – Key employees

The Management Board of Alfen recognises the importance of its key employees to the future success of the Company. Therefore, on 4 October 2018, a long-term incentive plan (‘LTIP Key employees’) was introduced for a number of designated employees within the group of the Company.

The following grants, comprising of Ordinary Shares in the Company, have been made under this plan:

<table>
<thead>
<tr>
<th>Grant date</th>
<th>Number of Awards Granted</th>
<th>Exercise price</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 January 2019</td>
<td>37,316</td>
<td>Nil</td>
</tr>
<tr>
<td>1 January 2020</td>
<td>38,434</td>
<td>Nil</td>
</tr>
<tr>
<td>1 January 2021</td>
<td>8,147</td>
<td>Nil</td>
</tr>
<tr>
<td>1 January 2022</td>
<td>9,747</td>
<td>Nil</td>
</tr>
</tbody>
</table>

The conditional rights to acquire existing Ordinary Shares granted will be exercisable in exchange for Ordinary Shares on the day that is four years after the grant date, on the condition that the relevant employee of Alfen continues to be employed by the Company on this date (subject to certain arrangements for exceptional circumstances, such as death of the employee). Besides the aforementioned service vesting condition no other vesting conditions are applicable for the LTIP Key employees.

Long-term incentive plan – Board of Directors

As part of the remuneration policy, which has been adopted by the general meeting of shareholders on 7 April 2022, a long-term incentive plan for the Board of Directors is applicable in order to increase the alignment between shareholder’s interest and the interest of the Board of Directors.
The following grants, comprising of Ordinary Shares in the Company, have been made under this plan:

<table>
<thead>
<tr>
<th>Grant date</th>
<th>Number of Awards Granted</th>
<th>Exercise price</th>
</tr>
</thead>
<tbody>
<tr>
<td>8 April 2020</td>
<td>13,783</td>

</tr>
<tr>
<td>29 April 2021</td>
<td>3,115</td>
<td>Nil</td>
</tr>
<tr>
<td>20 July 2021**</td>
<td>638</td>
<td>Nil</td>
</tr>
<tr>
<td>26 April 2022</td>
<td>4,720</td>
<td>Nil</td>
</tr>
</tbody>
</table>

* All 100% realisation of the applicable performance conditions. The actual number of Awards that will vest can range between nil (at 0% realisation) and 27,820 (at 125% realisation).

** Transferred from key employees to board of directors in alignment with the appointment of Michelle Lesh (CCO) as member of the board of directors.

The conditional rights to acquire existing Ordinary Shares granted will be exercisable in exchange for Ordinary Shares on the day that is three years after inception of the service and performance period, subject to continued employment as a member of the Board of Directors and certain non-market based performance vesting conditions.

The service and performance period are starting on the 1st of January of the applicable financial year, in which the grant has been made. Besides the aforementioned service and performance vesting conditions there is one additional condition in place, which is an one year and a two year holding period after vesting date for grants made in 2020-2021 and 2022, respectively.

In addition, the following discretionary share-based sign-on bonus, with a grant date fair value of €74.25, was made to our CCO on 6 April 2021, which has been vested and exercised on 31 December 2021 and 1 January 2022, respectively.

Fair value measurement

The Company used the Black & Scholes model to determine the fair value of the share-based payments plans at grant date. The market price of the Company’s Ordinary Shares for the different plans at grant date was:

<table>

** Transferred from key employees to board of directors in alignment with the appointment of Michelle Lesh (CCO) as member of the board of directors.
The present value for expected dividend over the vesting period for all plans is nil, because the Company has currently no intention to distribute dividends in the foreseeable future in order to be able to further invest in the growth of the Company. Consequently and in conjunction with an exercise price of nil, both the expected volatility and risk-free-rate have no impact on the fair value determination at grant date.

Share-based payment expenses

Share-based payment expenses recognised as other operating costs in the statement of comprehensive income:

Effect of tax incentives

To drive innovation, Dutch corporate income tax law provides a specific tax incentive scheme known as the Innovation Box facility. Based on this facility, qualified income associated with R&D activities is subject to an effective tax rate of 9% as compared to the Dutch statutory rate of 25.8%.

In financial year 2021, Alfen concluded an agreement with the Dutch tax authorities, in which the application of the innovation box benefit is determined in alignment with Dutch corporate income tax law. This agreement applies for the years 2019 through 2024 assuming facts and circumstances do not change.

The total tax effect of applying the innovation box is 6.1% for the first half-year of 2022.

Non-taxable expenses

Non-taxable expenses are mainly related to non-deductible share-based payment expenses relating to the Long-term incentive plans.
### Note 9 Borrowings

<td>12,436</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>18,532</strong></td>
<td><strong>18,400</strong></td>
</tr>
</tbody>
</table>

The repayment obligations as per 30 June 2022 and 31 December 2021 are as follows:

- **Breakdown current (<1 year)**
  - Borrowings: 1,048
  - Factoring Alfen Elkamo: 1,665
  - Lease liabilities: 2,583

### Note 10 Financial instruments by category

The Company has no financial assets or liabilities measured at fair value.

At 30 June 2022 and 31 December 2021, the carrying amounts of cash and cash equivalents, trade and other receivables and trade and other payables approximated their fair values due to the short-term maturities of these assets and liabilities. The fair values of the long-term debt are not materially different from the carrying amounts as the interest rate risk is a floating rate plus spread where the spread equals the current market spread.

### Note 11 Related party transactions

All legal entities that can be controlled, jointly controlled or significantly influenced are considered to be a related party. Also, entities which can control, jointly control or significantly influence the Company are considered a related party. In addition, statutory and supervisory directors and close relatives are regarded as related parties.

Intercompany transactions are carried out at arm’s length.

The following transactions were carried out with related parties:

- Share-based payments (Note 7);
- Remuneration of the Management Board and Supervisory Board.
